

Title:	How to get authorization code in HPP	Version:	HPP V2.10.380	Date:	09/10/2024
Product:	AX Pro, HPP			Page:	1 of 3

Preparation

1. AX PRO V1.2.9 build 240621
2. Hik-Partner Pro App

How to get authorization code in HPP

1. Why do we need HPP to provide authorization code?

When End User has some alarm issue, Hikvision's technical support engineers need to check some configuration parameters. In the past, we asked users for their HPP accounts and passwords to check configuration information.

Now HPP users just generate an authorization code, and engineers can convert the unique verification code into a URL to log in to the user's device to view some information without the user's HPP account and password, ensuring user information security.

2. How does it work?

For example, there are three detectors in the customer's Area1: Zone1、Zone2、Zone3、Zone4, if the customer only wants zone1 not working in the Stay Arming state, which is in the bypass state, it will not trigger. He only need to enable "stay arm bypass" in Zone1 configuration page.

2.1 Log in your HPP account in Portal

2.2 Open the “**help**” options and you will find “**After-Sales Authorization Code**”, and click it.

2.3 Enter “**After-Sales Authorization Code**”, choose valid time, and generate an authorization code.

After-Sales Authorization Code

The after-sales authorization code is exclusive to Hikvision's technicians for troubleshooting only. You can give your authorization code to Hikvision's technicians when it is necessary for them to log in to your account for troubleshooting. Hikvision's technicians can log in to your account via the authorization code, and can view information and perform operations related to the site management, remote configuration, health monitoring, company, business, etc. When problems related to security control panels are encountered, Hikvision's technicians may need to log in to the Installer Admin account to operate and configure the panels if necessary. You can set a validity period for the authorization code according to your needs. Others will not be able to log in to your account via the authorization code once it expires.

The after-sales authorization code is invalidated.
