How to add NAS to NVR

This article introduces the configuration methods for adding NAS in the following five interfaces, GUI V5.x, GUI V4.x, EUI, Web V5.x and Web V4.x.

1. GUI V5.x

a. Go to “Storage -> Storage HDD -> Add Network HDD”

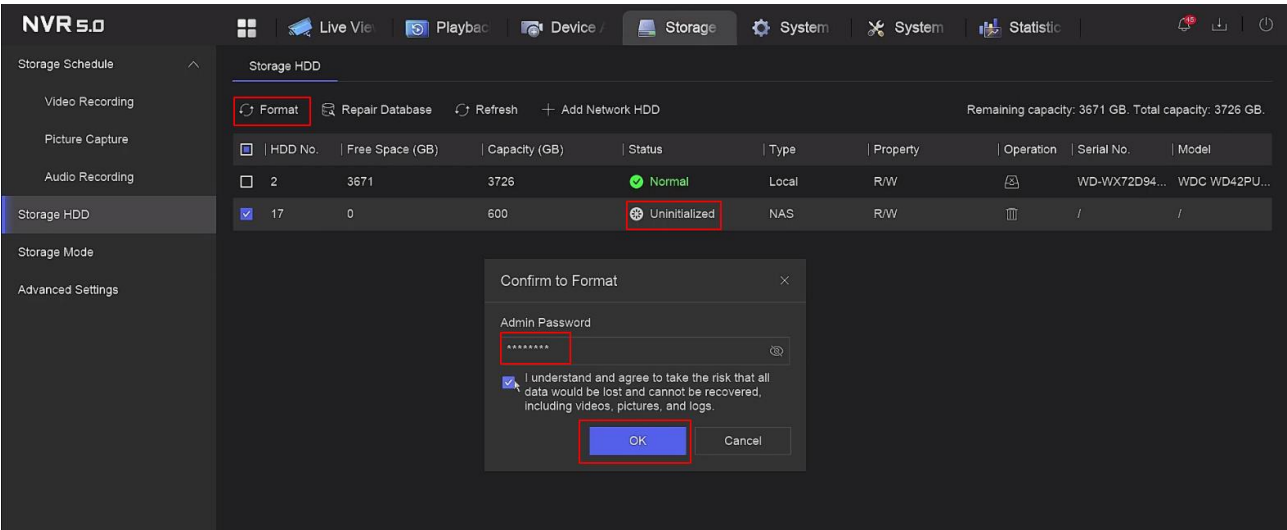

b. Select “NAS”, input the Server address of NAS, search the directory of NAS and select a File Path to store video recording.

- c. After clicking “OK”, it will show an uninitialized state, which needs to be formatted before it can be used normally. Click the “Format” button, and enter the password of the admin user to proceed with the formatting operation.

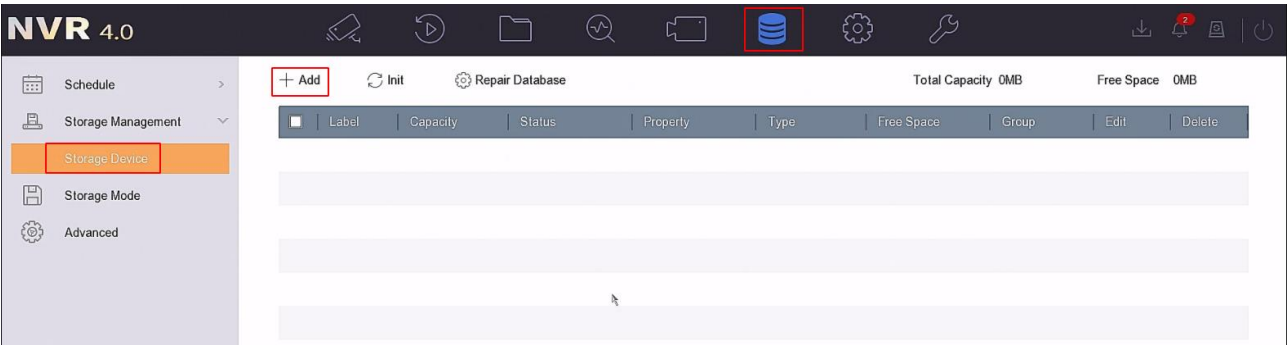

- d. The initializing process may take a long time, please wait patiently. When the status is “Normal”, it can start storing recordings. In addition, V5.x versions require that the storage space of the NAS be greater than 512GB.

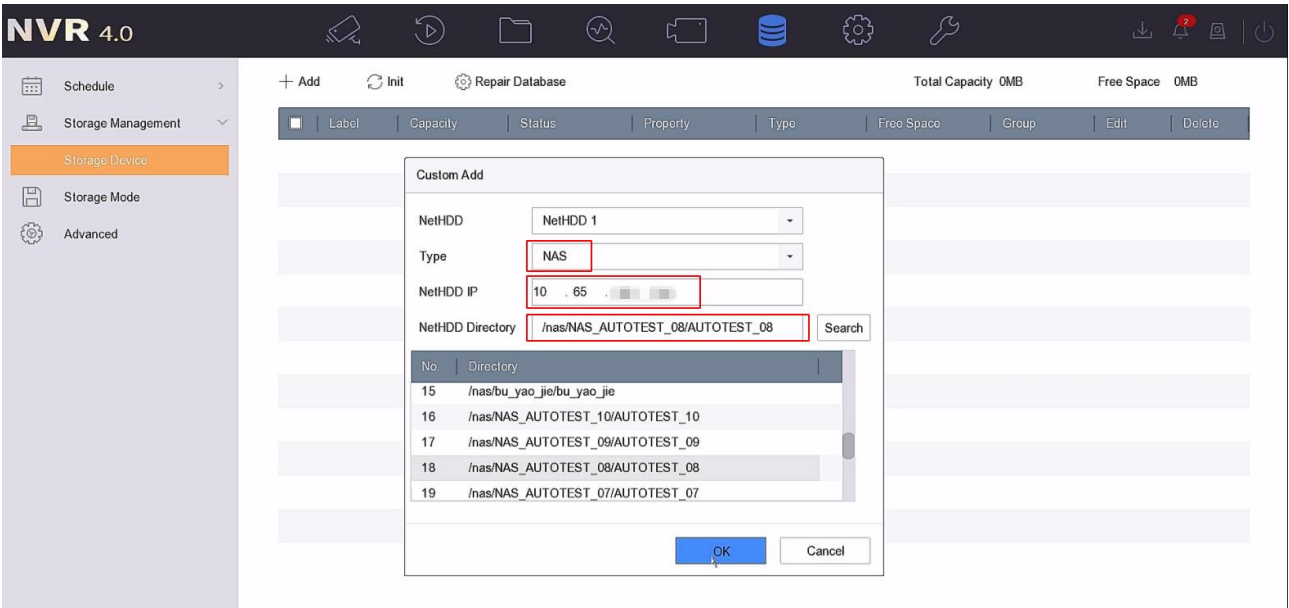

2. GUI V4.x

- a. Go to “Storage -> Storage Management -> Storage Device -> Add”

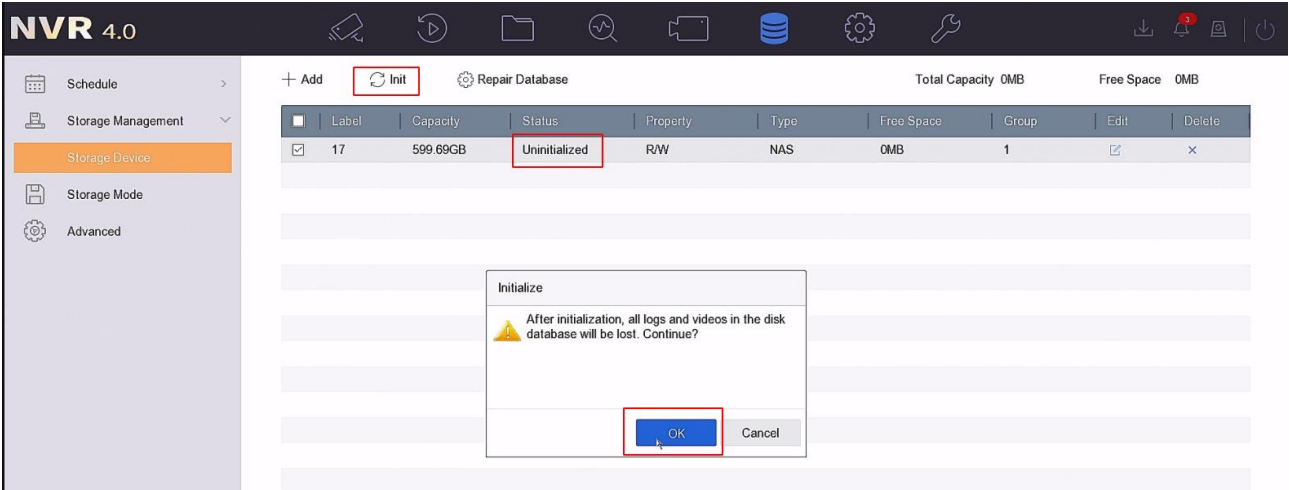

- b. Select “NAS”, input the Server address of NAS, search the directory of NAS and select a NetHDD directory to store video recording.
